Getting started

- Unpack the lamp and remove all packaging materials and place on a flat surface.
- Power the device by using either the USB lead provided (connected to a suitable USB power source) or by inserting 4 x AAA batteries (not supplied) into the battery compartment on the underside of the lamp.
- Touch the control sensor to turn the lamp on, then press again in quick succession to select the required brightness setting.
- Touch the sensor once more to turn the lamp off.

LED type	14 x SMD
Colour temperature	6500K
Average lifetime	50,000 hours
Beam angle	120°
Dimensions	160 x 56 x 350mm
Weight	153g

Safety Disclaimer

Do not attempt to service this product yourself as opening or removing covers may result in fire, electric shock or equipment damage and also invalidate the warranty. This product is only designed for indoor use and must be kept away from water and high humidity along with high temperatures and direct sunlight.

Before use check the unit for any signs of damage and ensure the USB lead is connected correctly or the batteries are inserted correctly before switching on. Do not leave batteries in the unit for a sustained period on inactivity as they can leak and cause damage to the internal parts.

This product is classed as Electrical or Electronic equipment and should not be disposed with other household or commercial waste at the end of its useful life. The goods must be disposed of according to your local council guidelines.
