Dear Customer,

To connect your ceiling speakers to the internet, please follow these steps:

Note: The Wi-Fi network you use must be password-protected (it cannot be an open or guest network).

1. Turn off mobile data on your phone.
2. Turn on location services.
3. Activate Wi-Fi setup on the speaker using the remote.
4. Open the 4STREAM app on your phone.
5. Tap Add Device.
6. Wait for "Wi-Fi Pair" to appear, then select it.
7. Tap the Settings button.
8. Select “smart-audio” as your Wi-Fi network.
9. Return to the app; you should now see your main Wi-Fi network.
10. Enter your Wi-Fi password and tap Continue.
11. Reconnect your phone to your home Wi-Fi network.
12. Once connected, tap Next in the app.
13. Rename the speaker (e.g., "smart-audio_EA8C") to suit its location.
14. Tap the top-right arrow to complete the setup.
